STRENGTHS & EXPERIENCE

- **Applications and Tools development and testing:** Blackbox testing. Design, test, produce and present documentation and training materials; User Interface design, participate in numerous user-interface studies. Consistently generate majority of bug and enhancement reports within department.
- **Website development:** Set up, design, implement, test and maintain websites for varied small business, non-profit, and government clients. HTML and Javascript coding, Analog and digital photography, Photoshop, graphic design, sound processing, user interface and user experience. Liaison between ISPs and clients.
- **Technical writing and website development:** Write, illustrate and maintain publications, technical reference documents, manuals, promotions and websites.
- **Programming and applications:** HTML, Fortran, Basic; also Visual Basic, Javascript, C++, UNIX. Proficient in numerous Macintosh and Windows applications, including font development, bug tracking, word processing, spreadsheet, email, internet, web browser and authoring, graphics, multimedia, communications, diagnostics and repair.
- **Graphic design and artwork:** Create icons, splash screens, and info-windows for software tools, applications, system extensions, games, web pages. Produce artwork and photography for t-shirts, presentations, promotions, posters, e-mail forms, websites, CDs jackets for internal and event attendee distribution.
- **Font Research & Development:** Develop, test, proof (functionally and esthetically) TrueType, Intellifont, Ikarus and Adobe fonts for Macintosh, Windows and Agfa platforms. Research expanding the capabilities of TrueType typography. Technical liaison to contractors. Investigate web-based internet on-line font distribution and marketing systems. Advise legal department on font pirating issues. Idea for reuse and expansion of an existing font as a multi-language system font saved approximately \$100,000 in development and localization costs.
- **Multilingual Font development and testing:** Produce and test roman and non-roman alphabet fonts for:
MacOS operating systems (System 7 through OS8.6; domestic and localized versions);
In-house rapid-prototype applications;
Bundled applications (eWorld, QuickTime);
Shrink wrap products for retail sales (Apple Font Pack, Language Kits);
Specialize in one-time and unusual projects and fonts (i.e. dingbat, symbol fonts)
- **Technical Support:** Set up, maintain and repair hardware, software, networks, servers for in-house use and developer training events. Administrate local servers, archive and source control. Telephone technical support problem solving and software debugging.
- **Training:** Produce training materials for font designers and developer training events. Create and maintain technical instructional material distributed through QA division. Present tools and teach students at developer training events worldwide. Manage college computer labs; supervise student assistants; thesis advisor. Teach college-level courses in Computer Graphics. Orient and train new employees.
- **Health & Safety:** Volunteer Firefighter, Emergency Response Team Building Captain (Apple & Palm), Certified Hazmat Specialist and medical First Responder; Ergonomics advisor, Health & Safety site inspector, Safety Committee member. Confined space entry, air and water quality monitoring, lockout/tagout, etc.
- **Operations & Maintenance:** responsible for construction, operation and maintenance of remediation systems for treating industrially contaminated groundwater, including electrical, plumbing, mechanical, chemical treatment systems, computer PLC and security systems; forklift operation.
